# Quickly turn insights into action

About

Operational Insights streamlines clinical trial operations with built-in AI that automatically surfaces key trial insights. Centralized, role-specific dashboards allow users to quickly action these insights to efficiently advance trials and proactively mitigate risks. Unblock obstacles to study startup, improve decision making, monitor KPIs, assign and track tasks, and accelerate your time to market – today.

Executive dashboard

Reduce time to action with AI generated insights

- AI-generated summaries alert teams to issues that require action
- Directly assign tasks to team members for further investigation

Increase collaboration and transparency

- All team members work from the same data, enabling collaboration
- Easily assign tasks and set alerts

Accelerate study startup

- Monitor and act on start-up activities in a single location
- Unblock obstacles with real-time metrics
- Automatically tracked milestones at the study, country,

Create and manage all KPIs centrally

- Configure, approve, and manage KPIs in a single workflow
- Compare metrics across studies with a central library of KPIs

Features

Study, Country, and Site Analytics
Perform analytics and review KPIs by drilling down from study to country to site level within a single screen.

Trends
Visualize trends over time for key indicators such as enrollment, site status, and issues. Track trial progress in real time and monitor the effects of any corrective actions taken.

Configurable Visuals and Dashboards
Easily configure visuals and dashboards out-of-the-box to fit your needs. No custom report builds or maintenance required.

Dashboard Navigation and Filtering
Intuitively drill down from study level to a single country or site within one dashboard.

Executive and Portfolio Dashboard
Get visibility into performance at the level of detail you need across multiple source systems.

Study Startup Module
Single location to monitor and act on study, country, and site level study start-up activities.

KPI Configuration and Dashboard
Configure KPIs and monitor all KPIs in one dashboard.

AI-Generated Insights
AI-generated insights alert teams to issues that require further action or investigation.

Tasks and Notification
Assign tasks to any team member or vendor that can be automatically tracked.

The Saama Difference

Only Saama's Operational Insights can help you drive insights to action with AI-generated alerts and complete visibility into your trial operations. Combining clinical, operational, and financial data in a single location, it enables seamlessly integrated workflows from study startup through KPI configuration, monitoring and more. Improve decision making, resolve issues faster, collaborate effectively, and accelerate your time to market with Saama.
